INTRODUCTION

Congratulations on purchasing the Ozito Multi Purpose Saw. We aim to provide quality tools at an affordable price. We hope you will enjoy using this product for many years.

Your Ozito Multi Purpose Saw OZMPS500A has been designed for cutting various materials such as timber, aluminium, steel and plastics. It is intended for DIY use only.

SAFETY INSTRUCTIONS

Warning! When using mains-powered equipment, basic safety precautions, including the following, should always be followed to reduce risk of fire, electric shock, personal injury and material damage.

Read and understand the complete manual prior to operating this tool.

Save these instructions and other documents supplied with this machine for future reference.

ELECTRICAL SAFETY

The electric motor has been designed for 230-240V only. Always check that the power supply corresponds to the voltage on the rating plate.

Note: The supply of 230V and 240V on Ozito tools are interchangeable for Australia and New Zealand.

This tool is double insulated in accordance with AS/NZS 3160: 1996; therefore no earth wire is required.

If the supply cord is damaged, it must be replaced by an electrician or a power tool repairer in order to avoid a hazard.

Note: Double insulation does not take the place of normal safety precautions when operating this tool. The insulation system is for added protection against injury resulting from a possible electrical insulation failure within the tool.

Using an Extension Lead

Always use an approved extension lead suitable for the power input of this tool. Before use, inspect the extension lead for signs of damage, wear and ageing. Replace the extension lead if damaged or defective.

When using an extension lead on a reel, always unwind the lead completely. Use of an extension lead not suitable for the power input of the tool or which is damaged or defective may result in a risk of fire and/or electric shock.
GENERAL

**Warning!** Read all instructions. Failure to follow all instructions listed below may result in electric shock, fire and/or serious injury. The term “Power Tool” in all of the warnings listed below refers to your mains operated (corded) power tool or battery operated (cordless) power tool.

SAVE THESE INSTRUCTIONS

1) **WORK AREA**

a) **Keep work area clean and well lit.** Cluttered and dark areas invite accidents.

b) **Do not operate power tools in explosive atmospheres,** such as in the presence of flammable liquids, gases, or dust. Power tools create sparks which may ignite the dust or fumes.

c) **Keep children and bystanders away while operating a power tool.** Distractions can cause you to lose control.

2) **ELECTRICAL SAFETY**

a) **Power tool plugs must match the outlet.** Never modify the plug in any way. Do not use any adapter plugs with earthed (grounded) power tools. Unmodified plugs and matching outlets will reduce risk of electric shock.

b) **Avoid body contact with earthed or grounded surfaces such as pipes, radiators, ranges and refrigerators.** There is an increased risk of electric shock if your body is earthed or grounded.

c) **Do not expose power tools to rain or wet conditions.** Water entering a power tool will increase the risk of electric shock.

d) **Do not abuse the cord.** Never use the cord for carrying, pulling or unplugging the power tool. Keep cord away from heat, oil, sharp edges or moving parts. Damaged or entangled cords increase the risk of electric shock.

e) **Replacement of the supply cord.** If the supply cord is damaged, it must be replaced by an electrician or a power tool repairer.

f) **When operating a power tool outdoors, use an extension cord suitable for outdoor use.** Use of a cord suitable for outdoor use reduces the risk of electric shock.

g) **Have your tool repaired by a an electrician or a power tool repairer.** This power tool complies with relevant safety requirements. To avoid danger, electrical appliances must only be repaired by qualified personnel using original spare parts; otherwise this may result in considerable danger to the user.

3) **PERSONAL SAFETY**

a) **Stay alert, watch what you are doing and use common sense when operating a power tool.** Do not use a power tool while you are tired or under the influence of drugs, alcohol or medication. A moment of inattention while operating power tools may result in serious personal injury.

b) **Use safety equipment. Always wear eye protection.** Safety equipment such as dust mask, non-skid safety shoes, hard hat, or hearing protection used for appropriate conditions will reduce personal injuries.
c) **Avoid accidental starting. Ensure the switch is in the off position before plugging in.** Carrying power tools with your finger on the switch or plugging in power tools that have the switch on invites accidents.

d) **Remove any adjusting key or wrench before turning the power tool on.** A wrench or a key left attached to a rotating part of the power tool may result in personal injury.

e) **Do not overreach. Keep proper footing and balance at all times.** This enables better control of the power tool in unexpected situations.

f) **Dress properly. Do not wear loose clothing or jewellery. Keep your hair, clothing and gloves away from moving parts.** Loose clothes, jewellery or long hair can be caught in moving parts.

g) **If devices are provided for the connection of dust extraction and collection facilities, ensure these are connected and properly used.** Use of these devices can reduce dust related hazards.

4) **POWER TOOL USE AND CARE**

a) **Do not force the power tool. Use the correct power tool for your application.** The correct power tool will do the job better and safer at the rate for which it was designed.

b) **Do not use the power tool if the switch does not turn it on and off.** Any power tool that can not be controlled with the switch is dangerous and must be repaired.

c) **Disconnect the plug from the power source before making any adjustments, changing accessories, or storing power tools.** Such preventive safety measures reduce the risk of starting the power tool accidentally.

d) **Store idle power tools, unplugged & out of the reach of children and do not allow persons unfamiliar with the power tool or these instructions to operate the power tool.** Power tools are dangerous in the hands of untrained users.

e) **Maintain power tools. Check for misalignment or binding of moving parts, breakage of parts and any other condition that may affect the power tools operation. If damaged, have the power tool repaired before use.** Many accidents are caused by poorly maintained power tools.

f) **Keep cutting tools sharp and clean.** Properly maintained cutting tools with sharp cutting edges are less likely to bind and are easier to control.

g) **Use the power tool, accessories and tool bits etc., in accordance with these instructions and in the manner intended for the particular type of power tool, taking into account the working conditions and the work to be performed.** Use of the power tool for operations different from intended could result in a hazardous situation.

5) **SERVICE**

a) **Have your power tool serviced by a qualified repair person using only identical replacement parts.** This will ensure that the safety of the power tool is maintained.
SAFETY INSTRUCTIONS FOR MULTI PURPOSE SAWS

Wear a hard hat (safety helmet), safety glasses and/or face shield. It is also highly recommended that you wear a dust mask, ear protection and padded gloves.

Check the blade carefully for cracks or damage prior to operation. Replace cracked or damaged blades immediately.

Hold the tool firmly during operation.

Ensure no one is below you when using the tool in elevated conditions.

Do not point the tool at anyone in the immediate vicinity.

**Warning!** When making a "blind" cut (you can't see behind what is being cut), be sure that hidden electrical wiring or water pipes are not in the path of the cut. If wires are present, they must be disconnected at their power source by a qualified person or avoided to prevent the possibility of lethal shock or fire.

Only hold the tool by the insulated gripping surfaces to prevent electric shock if you accidentally cut through a "live" wire. Water pipes in "blind" areas must be drained and capped before cutting.

If the blade hits against objects during operation, damage to the tool or dangerous blade breakage may occur.

Watch out for cut-off portions of the work piece being cut. They may fall and cause injury to you or someone near you.

When cutting metals, be cautious of hot, flying debris.

Do not touch the blade or the work piece immediately after operation; they may be extremely hot and could potentially burn your skin.

Always switch off the tool and wait until the blade has come to a complete stop before withdrawing the blade from the work piece. This will prevent the blade from snapping which could cause you to lose your grip and/or control of the saw.

 OPERAT ION

**Warning!** Always ensure that the Multi Purpose Saw is switched off and the plug is disconnected from the power point prior to making any adjustments, changing blades, cleaning or when the tool is not in use.

Fitting blades

The Multi Purpose Saw is designed to accept different blades which are suitable to cut timber, metal or plastics.
OPERATION (cont.)

Locate the allen key that is attached to the cordset protector near the rear handle. Find the blade locking hex head screw in the slot on the side housing as per diagram. Insert allen key and loosen the blade locking screw but do not remove. Position the hole in the blade over the retaining pin between blade clamping plate and blade holder shaft. Using the allen key, tighten the blade clamp screw. Do not over tighten. Check the blade clamping mechanism periodically to ensure blade is secure.

Switch

The Multi Purpose Saw has a lock-off switch with a variable speed function. The on/off switch is located on the underside of the rear handle. The variable speed control is located on the top of the rear handle.

To turn the saw on, slide back the safety switch on the trigger and squeeze the on/off trigger. To turn the saw off, release the on/off trigger.

The variable speed control fitted to the saw enables the operator to better control the start of a cut. The operator can also choose the appropriate speed depending on the circumstances. The dial is rotated to achieve the desired speed.

Making a cut

**Warning!** Ensure that work pieces being cut are securely clamped.

Hold the saw firmly with the blade facing away from you. Turn the saw on. Wait till the motor has reached maximum speed before starting a cut.

**Note:** Only supply sufficient pressure to allow the blade to do the cutting. Do not force the operation. Blades could be damaged if excessive pressure is applied.
MAINTENANCE

• When not in use the sander should be stored in a dry, frost free location not within the reach of children.
• Keep ventilation slots of the sander clean at all times and prevent any foreign matter from entering.
• If the housing of the sander requires cleaning do not use solvents but a moist soft cloth only.
• Blow out the unit through the rear ventilation slots with compressed air periodically to ensure a dust free area around the switch.

Note: Ozito Industries will not be responsible for any damage or injuries caused by repair of the sander by an unauthorised person or by mishandling of the tool.

CONTENTS

1 x Multi Purpose Saw OZMPS500A
1 x 230mm Wood Cutting Blade
1 x 118mm Jigsaw Blade

1 x Metal Cutting Blade
1 x Spare Set Carbon Brushes
1 x Operation manual

WARRANTY

THIS WARRANTY FORM AND CONFIRMED BUNNINGS REGISTER RECEIPT SHOULD BE RETAINED BY THE CUSTOMER AT ALL TIMES

The warranty is only made available by returning the product to your nearest Bunnings Building Supplies with a confirmed Bunnings register receipt.

YOUR WARRANTY FORM SHOULD BE RETAINED BY YOU AT ALL TIMES.

SHOULD YOU HAVE ANY QUESTIONS PRIOR TO RETURNING YOUR PRODUCT FOR WARRANTY OR REPAIR PLEASE TELEPHONE OUR CUSTOMER SERVICE HELPLINE:

Australia 1800 069 486
New Zealand 0508 069 486

TO ENSURE A SPEEDY RESPONSE PLEASE HAVE THE MODEL NUMBER AND DATE OF PURCHASE AVAILABLE. AN OZITO CUSTOMER SERVICE REPRESENTATIVE WILL TAKE YOUR CALL AND ANSWER ANY QUESTIONS YOU MAY HAVE RELATING TO THE WARRANTY POLICY OR PROCEDURE.

PURCHASED FROM: __________________________________________________________

DATE PURCHASED: _______________________________________________________

3 YEAR REPLACEMENT WARRANTY
Your Ozito tool is guaranteed for a period of 36 months from the original date of purchase and is intended for DIY (Do it yourself) use only.

WARNING
The following actions will result in the warranty being void.

• Professional, Industrial or high frequency use.
• If the tool has been operated on a supply voltage other than that specified on the tool.
• If the tool shows signs of damage or defects caused by or resulting from abuse, accidents or alterations.
• If the tool is disassembled or tampered with in any way.

Note: Warranty excludes consumable parts such as brushes, batteries, sanding pads, blades, discs, drill bits, collects and router bits.
