WHAT'S IN THE BOX

- Staple Nail Gun
- Staples
- Nails

3 YEAR REPLACEMENT WARRANTY

OZSNG16A
1. **LOADING STAPLES**

NOTE: THIS STAPLER ONLY ACCEPTS T50 18 GAUGE STAPLES. OTHER TYPES OF STAPLES, INCLUDING PAPER STAPLES, WILL JAM THE UNIT.

Ensure the tool is disconnected from the power supply before performing any of the following operations.

1. Hold the tool upside down.

2. Squeeze the magazine latch and pull the magazine out of the tool.

3. Insert a row of staples into the opening behind the nose piece.

   NOTE: Rows of staples longer than 120mm do not fit in the staple nail gun.

4. Push the loaded magazine back into the unit until it clips into place.
2. LOADING NAILS

1. Hold the tool upside down.
2. Squeeze the magazine latch and pull the magazine out of the tool.
3. Insert a row of nails into the opening behind the nose piece. Be sure to align them to the side marked with a nail marker.
4. Push the loaded magazine back into the unit until it clips into place.

3. CONTROLS

The tool is recommended for use with a residual current device with a rated residual current of 30mA or less.

1. To supply the tool with power, push the power switch to the “I” position.
2. To turn off, push the power switch to the “O” position.
3. To fire the staple nail gun, squeeze the on/off trigger.
**4. OPERATING THE STAPLE NAIL GUN**

1. Push the power switch to the “I” position.

2. Place the staple nail gun against the work surface so that the nosepiece of the tool is where you want the staple/nail to be located.

3. Push the tool firmly down on the work surface to depress the safety striker pin.

4. Squeeze the trigger switch to fire a staple/nail.

**NOTE:** The on/off trigger cannot be squeezed unless the safety striker pin is fully depressed.

**5. TROUBLESHOOTING**

**Jammed Staple Nail Gun**

**Note:** Ensure the staple nail gun is switched off and unplugged from the power supply before trying to remove any jammed nails.

1. Keep pressure on the magazine latch.

2. Insert a small flathead screwdriver into the gap between the nose piece and the end of the magazine.

3. Gently lever the screwdriver to pry the magazine open. Keep pressure on the magazine latch until it can be fully depressed.

**NOTE:** BE CAREFUL WHEN LEVERING THE MAGAZINE OPEN. USING TOO MUCH FORCE MAY BEND THE END OF THE MAGAZINE. IF THIS OCCURS THE UNIT WILL BE INOPERABLE.

4. With the magazine still open, tap the safety striker pin against a surface to dislodge any loose staples.
### MAINTENANCE

- If the enclosure of the staple nail gun requires cleaning, do not use solvents but a moist soft cloth only. Never let any liquid get inside the staple nail gun; never immerse any part of the staple nail gun into a liquid.

**Note:** Ozito Industries will not be responsible for any damage or injuries caused by the repair of the staple nail gun by an unauthorised person or by mishandling of the staple nail gun.

ELECTRICAL SAFETY

WARNING! When using mains-powered tools, basic safety precautions, including the following, should always be followed to reduce risk of fire, electric shock, personal injury and material damage. Read the whole manual carefully and make sure you know how to switch the tool off in an emergency, before operating the tool.

Save these instructions and other documents supplied with this tool for future reference. The correct power tool is double insulated in accordance with AS/NZS 3100, therefore no earth wire is required.

GENERAL POWER TOOL SAFETY WARNINGS - PERSONAL SAFETY

WARNING! Read all safety warnings and all instructions. Failure to follow the warnings and instructions may result in electric shock, fire and/or serious injury.

Save all warnings and instructions for future reference. The term “power tool” in the warnings refers to your mains-operated (corded) power tool or battery-operated (cordless) power tool.

1. Work area safety
a. Keep work area clean and well lit. Cluttered or dark areas invite accidents.
b. Do not operate power tools in explosive atmospheres, such as in the presence of flammable liquids, gases or dust. Power tools create sparks which may ignite the dust or fumes.
c. Keep children and bystanders away while operating a power tool. Distractions can cause you to lose control.

d. Electrical safety
a. Power tool plugs must match the outlet. Never modify the plug in any way. Do not use any adapter plugs with earthed (grounded) power tools. Unmodified plugs and matching outlets will reduce risk of electric shock.
b. Avoid body contact with earthed or grounded surfaces, such as pipes, radiators, ranges and refrigerators. There is an increased risk of electric shock if your body is earthed or grounded.
c. Do not expose power tools to rain or wet conditions. Water entering a power tool will increase the risk of electric shock.
d. Do not abuse the cord. Never use the cord for carrying, pulling or unplugging the power tool. Damaged or entangled cords increase the risk of electric shock.
e. When operating a power tool outdoors, use an extension cord suitable for outdoor use. Use of a cord suitable for indoor use reduces the risk of electric shock.
f. If operating a power tool in a damp location is unavoidable, use a residual current device (RCD) protected supply. Use of an RCD reduces the risk of electric shock.

g. Personal safety
a. Stay alert, watch what you are doing and use common sense when operating a power tool. Do not use a power tool while you are tired or under the influence of drugs, alcohol or medication. A moment of inattention while operating power tools may result in serious personal injury.
b. Use personal protective equipment. Always wear eye protection. Protective equipment such as dust mask, non-skid safety shoes, hard hat, or hearing protection used for appropriate conditions will reduce personal injuries.
c. Prevent unintentional starting. Ensure the switch is in the off-position before connecting to power source and/or battery pack, picking up or carrying the tool. Carrying power tools with your finger on the switch or energising power tools that have the switch on invites accidents.

d. Remove any adjusting key or wrench before turning the power tool on. A wrench or a key left attached to a rotating part of the power tool may result in personal injury.
e. Do not overreach. Keep proper footing and balance at all times. This enables better control of the tool in unexpected situations.
f. Dress properly. Do not wear loose clothing or jewellery. Keep your hair, clothing and gloves away from moving parts.
g. If devices are provided for the connection of dust extraction and collection facilities, ensure these are connected and properly used. Use of dust collection can reduce dust-related hazards.

2. Electrical safety
a. Use extension leads suitable for the power input of the tool or which is damaged or defective may result in a risk of fire and electric shock.
b. If the supply cord is damaged, it must be replaced by an electrician or a power tool repairer in order to avoid a hazard.

c. Disconnect the plug from the power source before attempting to clear the jam.

Note: Double insulation does not take the place of normal safety precautions when operating this tool. The insulation system is for added protection against injury resulting from a possible electrical insulation failure within the tool.

Using an Extension Lead
Always use an approved extension lead suitable for the power input of this tool. Before use, inspect the extension lead for signs of damage, wear and ageing. Replace the extension lead if damaged or defective.

When using an extension lead on a reel, always unwind the lead completely. Use of an extension lead not suitable for the power input of the tool or which is damaged or defective may result in a risk of fire and electric shock.

STAPLE NAIL GUN SAFETY WARNINGS

- Never aim the gun at people or animals.
- In the event of a staple or nail jamming within the gun, disconnect from the power supply before attempting to clear the jam.
- Keep your hands clear of where you are stapling or nailing.
IN ORDER TO MAKE A CLAIM UNDER THIS WARRANTY YOU MUST RETURN THE PRODUCT TO YOUR NEAREST BUNNINGS WAREHOUSE WITH YOUR BUNNINGS REGISTER RECEIPT. PRIOR TO RETURNING YOUR PRODUCT FOR WARRANTY PLEASE TELEPHONE OUR CUSTOMER SERVICE HELpline:

Australia 1800 069 486  
New Zealand 0508 069 486

TO ENSURE A SPEEDY RESPONSE PLEASE HAVE THE MODEL NUMBER AND DATE OF PURCHASE AVAILABLE. A CUSTOMER SERVICE REPRESENTATIVE WILL TAKE YOUR CALL AND ANSWER ANY QUESTIONS YOU MAY HAVE RELATING TO THE WARRANTY POLICY OR PROCEDURE.

The benefits provided under this warranty are in addition to other rights and remedies which are available to you at law. Our goods come with guarantees that cannot be excluded at law. You are entitled to a replacement or refund for a major failure and for compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure.

Generally you will be responsible for all costs associated with a claim under this warranty, however, where you have suffered any additional direct loss as a result of a defective product you may be able to claim such expenses by contacting our customer service helpline above.

3 YEAR REPLACEMENT WARRANTY

Your product is guaranteed for a period of 36 months from the original date of purchase and is intended for DIY (Do It Yourself) use only. If a product is defective it will be replaced in accordance with the terms of this warranty. Warranty excludes consumable parts, for example: staples etc.

WARNING

The following actions will result in the warranty being void.

- If the tool has been operated on a supply voltage other than that specified on the tool.
- If the tool shows signs of damage or defects caused by or resulting from abuse, accidents or alterations.
- Failure to perform maintenance as set out within the instruction manual.
- If the tool is disassembled or tampered with in any way.
- Professional, industrial or high frequency use.
